Ashish Kumar Sharma

A goal-oriented professional with **nearly 18 years of experience** in **Release and Build management, DevOps and Middleware end to end implementations such as WebSphere, BPM, MQ etc.;** Targeting senior level assignments in **Middleware/Infrastructure/ DevOps /Release Management** with an organisation of high repute

ashandish@yahoo.com +65-83932853

CORE COMPETENCIES

- Problem Management
- Incident Management
- DevOps Engineering
- Project Management
- Root Cause Analysis
- Change/ Release Management
- Middleware SME

SOFT SKILLS

EDUCATION

2004 — Bachelor of Technology in Computer Science and Engineering from Madan Mohan Malviya University of Technology, Gorakhpur

CERTIFICATIONS

- TOGAF 9.1 Certified
- IBM Certified IT Specialist Experienced Level in the Support, Application Integration and Middleware Specialisations
- IBM Certified System Administrator, Advanced System Administrator for WebSphere Application Server, Network Deployment V6.1, V7.0

PROFILE SUMMARY

- **TOGAF 9.1 Certified** professional with hands-on experience in the areas of administration, installation, configuration, migration, upgrade, performance tuning and troubleshooting of **WebSphere Application Server, IBM BPM, WebSphere MQ, IBM HTTP Server, Apache http Server**
- In-depth understanding of **Middleware/ DevOps/ Build/ Deploy/ Release Management/SSL Certificate Management** on ***nix (Linux, Solaris, AIX, HP-UX) and Windows platforms**
- Expertise in managing complete project activities, ensuring timely deliveries as per defined quality standards and **troubleshooting** complex information systems
- Insightful experience on **DevOps Tools** such as **Jenkins, Ansible, Chef, ANT & MAVEN Scripting, Rocket Aldon, Disaster Recovery, ITIL, Performance Tuning, Non-functional Testing, Load Testing, Automation, System Monitoring, Application Deployment**; knowledge of deploying & operating highly available, scalable systems
- **Customer-centric professional** with skills in managing client challenges and providing effective technical support within SLA
- Proven track record in overcoming complex challenges and successfully completing projects

TECHNICAL SKILLS

- WebSphere Application Server Administration
- Apache Web Server, IBM Http Server (IHS) Administration, IIS
- WebSphere Process Server 7.0, IBM BPM Advanced Process Server 8.5 Administration
- WebSphere MQ Administration
- AIX, Solaris, Linux Administration
- UNIX Shell Scripting (Bash, Bourne, Korn), Perl, AWK, SED, GREP and so on
- wsadmin Scripting (JACL and JYTHON)
- ANT Scripting, MAVEN Scripting
- CVS, SVN, Rocket DevOps Source Code Management Tools
- Ansible, Docker, Chef, Jenkins
- SSL Certificate Management
- Java, Enterprise Application, Web Application, EJB, Web Services, SOAP, WSDL, XML, SQL. Oracle, DB2

AWARDS & ACHIEVEMENTS

- Received appreciation from:
  - CIMB Bank Management for smooth and successful completion of the WebSphere Process Server 7.0 Migration to IBM BPM Advanced Process Server 8.5
  - The client for successfully completing the migration activity for Nissan USA Motors
  - Infosys Senior Management for development of Process Redemption Settlement Module for DBS Indonesia
- Recipient of Delivery Excellence Award for significant contribution in TD Bank Project

CAREER TIMELINE

WORK EXPERIENCE

Jan'19-till date: UOB Bank as Technical Manager

Jul'14-Dec'18: HCL, Singapore as Middleware Engineer and Release Manager

Jan'10-Apr'14: IBM India Private Limited as Middleware Engineer

Aug'07-Jan'10: Cognizant Technology Solutions as Middleware Engineer and Release Manager

Jun'04-Jul'07: Infosys Technologies Limited as Software Developer and Systems Administrator

PERSONAL DETAILS

Name: Ashish Kumar Sharma
Date of Birth: 1st January 1981
Languages Known: English and Hindi
Nationality: Indian

Please Refer to Annexure for Project Details:

ANNEXURE

Projects Executed:

Title: DevOps Source Code Management and Deploy Tool
Company: UOB
Designation: Technical Manager
Period: Jan'19-till date
Role:

- Eliminating security vulnerabilities of the tool
- Providing Technical Support, managing New Environment Setup and DR Setup for the tool
- Upgrade, Migration and performance tuning of the tool
- Agent installation and upgrade
- Setting up SCM and deployment tool for other countries
- Renewing SSL for any components involved such as Apache Tomcat, IIS, DB2 and so on
- Establishing secure communication between components
- Submitting Firewall Rules, Job Scheduling, Security and Infra related requests for new environments
- Developing SQL, batch and shell scripts for different purposes such as housekeeping, stop/start of components, converting text to pdf, generating reports etc.
- Troubleshooting and resolving system issues related to tool
- Liaising with vendor for items which need vendor support
- Documenting day to day tasks, recovery procedures, obsolescence assessment, system architecture, integration to DevOps and so on
- Planning budget for the tool support, upgradation and new environment setup
- Guide and assist team in day-to-day tasks, resolving issues and so on

Title: G3 Payment System Application, Middleware Implementation and Support
Company: HCL, Singapore
Client: CIMB Bank, Singapore
Designation: Middleware Engineer/ Release Manager
Period: Jul'14-Dec'18
Role:

- Managed all the Middleware implementation and supported activities for CIMB G3 payment system
- Conducted build, deployment and release management

- Planned the application architecture setup; identified points of failure and created a highly available, resilient application infrastructure
- Developed wsadmin Jython and Shell Scripts for deployment of applications and configured WebSphere such as the creation of JMS Queues, JDBC Data Source and checked Connection Pool
- Fixed issues that occurred in UAT and production environments and performed root cause analysis
- Coordinated with Developers, Testers and other Infra teams to fix issues that occur in production and test environments
- Suggested relevant stakeholders regarding the issues occurring in production and test environments
- Established Test (DEV, SIT, and UAT), Prod and DR application environments which included tasks such as installing and upgrading / installation and upgradation of
- WebSphere Application Server, WebSphere Process Server, IBM BPM and IBM WebSphere MQ; deployed applications and configured SSL, application and administrative security
- Prepared Change Implementation steps and presented CR in the CAB meeting; implemented production change during the change window; performed recovery from the backup in case of a Change Request failure
- Upgraded WebSphere Application Server, BPM and MQ
- Provided test environments support during the development phase of an ongoing CR
- Performed systems integration to Database, MQ, LDAP, Payment Gateway, IBM Connect Direct and Core Banking
- Tuned IBM BPM, WebSphere Process Server, WebSphere MQ and IBM WebSphere Application Server
- Executed IBM WebSphere Security hardening and conducted tests to verify the hardening
- Created documents for day-to-day activities, environment setup, disaster recovery, known error database, change implementation and release management

Title: WebSphere Specialist Support for DEV, SIT, BAT, PAT and Prod Environments
Company: IBM India Private Limited
Client: Toronto Dominion Bank, Canada
Designation: Middleware Engineer
Period: Jan'10-Apr'14
Role:

- Established setup of test environments for different projects which included tasks such as defining server, JDBC data source, queue connection factory, queues, namespace bindings, tuning heap memory, SSL configuration, and other application configuration
- Resolved issues in the areas of WebSphere Application Server, WebSphere MQ, Data Power, IBM Http Server, AIX, WebSphere plugin, and application architecture
- Authored Quick Support documents for test environments, Operational Support documents for production environment
- Acted as an intermediary between database, network, operating system and developer team in relevant situations
- Supported testing on different test environments (DEV, SIT, BAT and PAT), performed analysis of application performance with monitoring tools such as Tivoli Performance Viewer, topas utility and provided performance reports to the development team
- Followed standard operating procedures for few other Middleware technologies such as PEGA, IIS, and WebSphere Extreme Scale

Title: Maintain and Administer Nissan and Infiniti Portals, Migration of Application Infrastructure to New Hardware
Company: Cognizant Technology Solutions
Client: Nissan Motors, USA
Designation: Release and Deployment/ WebSphere Specialist
Period: Mar'08-Jan'10

Title: Maintain and Administer NY Times Ad Portal, Setup of DR Environment
Company: Cognizant Technology Solutions
Client: New York Times
Designation: WAS and WebSphere MQ Administrator
Period: Aug'07-Feb'08

Title: Implementation of Finacle Core Banking for DBS Hong Kong and DBS India
Company: Infosys Technologies Ltd.
Client: Development Bank of Singapore (DBS)
Designation: Systems Administrator for Middleware, UNIX and Database
Period: Oct'05-Jul'07

Title: Customise Finacle CRM Application as per Business Requirements
Company: Infosys Technologies Ltd.
Client: ATB, BBS
Designation: Software Developer
Period: Jul'05-Sep'05

Title: Addition of Unit Trust Functionality for DBS Indonesia
Company: Infosys Technologies Ltd.
Client: Development Bank of Singapore
Designation: Software Developer
Period: Oct'04-Jun'05
